

Sling Suit and Frames

Rodent Sling Suit and Frame

Sling Suit with Frame

The Sling Suit is manufactured from two fabrics for durability. The underside of the suit is made from a polyester mesh fabric which allows air to circulate while the animal is being restrained. The upper portion of the suit is made from a nylon-coated canvas with Velcro fasteners for a custom fit. The Rodent Sling Frame is manufactured with a durable high impact plastic base and adjustable connectors and supports made of stainless steel for dependability and easy cleaning.

- Rugged sling suits withstand repeated laundering for long life
- Large animal frames constructed of stainless steel for superior quality and easy cleaning
- Large animal sling suits are available for rabbit, cat and dog

Large Animal Restraint Unit

Restraint Sling

- The ideal way to immobilize large animals
- The rugged hammock provides stable, immobile support with comfort
- Frame is constructed from durable 2.5 cm (1 in) sq. stainless steel rod for exceptional quality and long life
- Available for dogs, cats and swine/sheep

This restraint unit includes two parts: the rugged sling hammock and the heavy duty restraint frame. The sling hammock is made from washable canvas type material that can withstand repeated washing. All leg and waste openings are edged with cotton jersey material for comfort. Nylon webbing is added to key points where extra strength is required. Heavy brass grommets allow the use of neck restraints to minimize the animal's head movement. Three sizes are available for use with adult cats, dogs, and swine/sheep.

The restraint frame is manufactured durable 1 inch square stainless steel rods which provides exceptional strength while being light weight. Each corner has self-locking, quick release cleats for limb ropes. These cleats help to prevent entanglement or accidental release. A deep 'V' opening permits unimpeded access to the head of the animal. The hammock slides onto the two upper horizontal rods. Once attached to the rods, simply load the animal into the hammock lift the entire unit onto the frame. The frame has a deep opening on one side to minimize lifting of the animal.

Two sizes of restraint frames are available. The large restraint frame measures, H x W x D, 99 x 61 x 91.4 cm (39 x 24 x 36 in). The extra-large restraint frame is slightly longer measuring, H x W x D, 99 x 61 x 121.9 cm (39 x 24 x 48 in). Both Frames are mounted on four heavy duty caster for mobility. Two have foot-activated brakes.

Rodent Sling Suits and Frames				
Size	Rat Catalog No.	Weight	Rabbit Catalog No.	Weight
X-Small	CGS8102.64	100 to 150 g	CGS8108.21	up to 2.7 kg

Frame	CGS8107.64	–	CGS8113.21	–

Large Animal Sling Suits and Frames

Similar to the Rodent Sling Suits, the Large Animal Sling Suits are manufactured from a polyester mesh fabric sewn in double layers. The jacket portion of the suit is closed with two zippers attached to an expandable spandex insert allowing for an adjustable fit. All jackets are unisex and all edges and leg openings are bound with cotton jersey fabric for added comfort. The suit attaches to the frame with detachable zippered sleeves along the length of the jacket. This enables the animal to be removed from the frame without removing the jacket. The bars of the frame slip through these detachable sleeves. The Frames are constructed from square stainless steel tube, which is mounted onto a UPVC base for superior quality and easy cleaning.
