

Restraint Devices

Broome Rodent Restainers

- Perfect for injections or blood sampling
- Entire tail is completely exposed for injections or sampling

These popular Broome Restainers provide fast and easy animal insertion. The cylindrical design of these Restainers solves the problem of the rodents turning once they are introduced into the Restraint.

To place the animal into the Restraint, loosen white Delrin nose piece and grasp the animal by the tail. Slide the animal into the Restraint by pulling its tail along the open groove until the animal is completely enclosed in the cylinder. Then slide the nose piece into the groove on the opposite side of the Restraint and place it up to the nose of the animal.

Broome Rodent Restainers			
Catalog No.	Animal Weight Range	Restraining Barrel ID	Length Min x Max
CGS 8116.65	15 to 30 g	25.4 mm	41 x 83 mm
CGS 8117.65	30 to 70 g	31.75 mm	50 x 100 mm
CGS 8118.65	70 to 125 g	38 mm	73 x 124 mm
CGS 8119.65	125 to 250 g	50.8 mm	70 x 178 mm
CGS 8120.65	250 to 500 g	63.5 mm	58 x 195 mm

Universal Rodent Restainers

- Restrains mice down to 10 grams!
- Removable raised inner floor
- Adjustable headgate and removable tailgate
- Headgate fits into any of four positions for various sizes of rodents
- Tailgate allows maximum closeness of occluding cuff to body when testing indirect blood pressure

These Universal Rodent Restainers have a unique raised inner floor which provides a better fit for smaller rodents and which may be removed for larger rodents. The inner floor is attached to the bottom by two nylon screws. Knurled, nickel-plated brass screws serve as base fasteners and legs. These Universal Rodent Restainers are constructed of 6.4 mm (1/4 in) thick, rigid, clear acrylic plastic. Openings in the headgate reduce restrictions on the rodent's breathing.
