

## Heat Pump, Pads and Thermal Barrier

- Provides a temperature controlled flow of water
- Small size is ideal for laboratories
- For use with the Temperature Therapy Pads listed to the right

- Ideal for maintaining body heat after surgery
- Provides localized warming
- Both disposable and reusable pads available

This Pump provides the source of warm water for use with the Temperature Therapy Pads. Its small size is ideal for any laboratory setting. It can be used with any of the Temperature Therapy Pads listed to the right. The Pump is available alone or with a single Therapy Polymer Pad. The tubing that connects the pump to the therapy pads is 3 m (10 ft) long. Select from standard plastic connectors or the new, more universal, metal Colder connectors.

These Temperature Therapy Pads provide localized warming during procedures, as well as maintaining body temperature after surgery. They work with the Heat Therapy Pump listed to the left.

A pump stand with 4 casters and a basket, which permits easy movement of the pump from animal to animal or lab to lab, is available separately.

Therapy pads are available in various sizes with a choice of materials. Select from standard plastic connectors or the new, more universal, metal Colder connectors.
