

## Micro Clips

### Micro Aneurysm Clips

- Ideal for temporarily clamping small animal vessels
- Stainless steel

These micro aneurysm clips provide an easy and secure way to stop blood flow while performing procedures on vessels. Using one of the applying forceps listed below, simply grasp the clip to open the jaw, slide it over the vessel and release. To remove, just perform the procedure in reverse. Its that simple. They do not compromise the vessel integrity.

Catalog No.	Product
CGS 8249.67	Micro Aneurysm Clip, straight, 60 gm pressure, 0.8 mm width, 6 mm long
CGS 8250.67	Micro Aneurysm Clip, straight, 85 gm pressure, 0.75 mm width, 5 mm long
CGS 8251.67	Micro Aneurysm Clip, slight curve, 85 gm pressure, 1 mm width, 6 mm long
CGS 8252.67	Micro Aneurysm Clip, strong curve, 85 gm pressure, 1 mm width, 6 mm long
CGS 8253.67	Micro Aneurysm Clip, 45° angle, 85 gm pressure, 1 mm width, 6 mm long
CGS 8254.67	Applying Forcep for Micro Aneurysm Clips, 14 cm (5.5 in) long
CGS 8255.67	Applying Forcep for Micro Aneurysm Clips with Lock, 14.6 cm (5.75 in) long

### Micro Vascular Clips

- Permanently stop blood flow through the vessel
- Quick and easy to apply

These clips are made from silver. They are easy to apply using the forcep.

Catalog No.	Product
CGS 8256.67	Micro Vascular Clip, silver, 5 mm clip length, box of 100
CGS 8257.67	Forcep for Applying Micro Vascular Clips, 14 cm (5.5 in) long

### Micro Vascular Clips

- For temporary occlusion of flow through a vessel
- Stainless steel

These stainless steel clips are available in three sizes.

Catalog No.	Product
CGS 8258.67	Micro Vascular Clip for 1 mm diameter vessels, occlusion pressure 10 to 15 grams
CGS 8259.67	Micro Vascular Clip for 1 to 2 mm diameter vessels, occlusion pressure 15 to 20 grams
CGS 8260.67	Micro Vascular Clip for 2 to 3 mm diameter vessels, occlusion pressure 20 to 30 grams
CGS 8261.67	Applying Forcep for Vascular Clips, 12.1 cm (4.75 in) long
