

Handheld UV Lamps and Stands

Handheld UV Lamps

These handheld lamps are powerful ultraviolet sources. A wide range of 21 models in a variety of UV wavelengths and wattages is available. Each lamp is manufactured with a silver-anodized, durable and attractive aluminum housing. Its narrow profile fits comfortably in the hand. The strap handle allows easy carrying and facilitates the use of each lamp.

Inside each lamp a specular aluminum reflector is used to optimize UV irradiance. Properly placed for fingertip control, the on/off switch is located on the end of the lamp. Standard with all short wave (254 nm) and mid-range (300 nm) ultraviolet lamps is the extended life UV transmitting filter glass, assuring higher UV intensity for thousands of hours. These lamps are available in three UV wavelengths: 254 nm, 300 nm and 365 nm. Dual-Wave™ handheld lamps are also available, as well as special versions with solid-state ballasts for AC and battery operation.

Flex-Mount™ Lamp Stands

We have a complete family of lamp stands for use with handheld UV lamps. The unique Flex-Mount™ Stands provide unlimited versatility. Cantilever mounting eliminates restrictions for positioning of material/object. Lamps can be positioned in any desired angle or direction.

Catalog No.	Product
CGS 8625.76	Flex-Mount Lamp Stand (4/6 Watt)
CGS 8626.76	Flex-Mount Lamp Stand (8 Watt)
