

Liquid Handling Products

Zippette Bottle-Top Dispenser

The Safety Zippette is the new model of performance and convenience. Designed with many new features - the Zippette now brings you closer than ever to totally trouble free safe dispensing.

Volume Adjustment

Each Zippette is fitted with a NEW twist and lock device that permits volume adjustment. The volume setting is visible by both left- and right-handed users.

Sterile Dispensing

A biological filter can be fitted, as shown on the previous page, for sterile dispensing. The Zippette Bottle-Top Dispensers are supplied with 33, 38, and 45 mm adaptors. Reservoirs must be purchased separately.

- Unbeatable accuracy and precision
- Chemically resistant liquid pathway allows a wide range of liquids to be safely dispensed
- Precision 0.1% cv, accuracy < 0.3%, DIN 12 650, and DIN 8655-3 compliant
- Removable, smooth action PTFE piston for easy cleaning
- Visible borosilicate glass barrel allows inspection of liquid before dispensing
- Dispense nozzle protection sleeve
- Fully autoclavable
- Available in five fully adjustable sizes 2.5 ml, 5 ml, 10 ml, 30 ml, and 50 ml
- Safe anti-tip amber glass reservoir with side filler neck available

MicroZippette Dispenser

The MicroZippette is a spring loaded, self-priming, hand held dispenser. It is ideal for rapid multi-dispensing of reagents as an alternative to micropipettors. Each unit has two capacities which are easily fixed by a simple twist of the plunger. Four models available 100/250 µl, 500/750 µl, 500/1000 µl, and 1000/2000 µl. Each MicroZippette is supplied complete with dispense tube, intake tube, and plastic coated safety bottle.

- Positive lock volume adjustment
- Precise and accurate
- May be conveniently stored in a refrigerator
- Chemically resistant liquid pathway
- Fully autoclavable
