- Double heat filtration system
- UL listed, CSA certified; mounting systems meet California Seismic codes
- Made in the U.S.A.; 3-year warranty

This light is supplied with a removable, autoclavable SteriHandle™ and disposable light cover sample. It is offered with a choice of mounting options: ceiling mount drop tube, ceiling mount Fastrac™, wall mount, or floorstand.

For the drop tube ceiling mount has a 0.76 m (30 in) drop tube which is suitable for most 2.44 to 2.74 m (8 to 9 ft) ceilings. The tube can be adapted by the installer to a shorter length if desired.

The floorstand model includes foot switch, locking casters and cord wrap.

This light is offered in a variety of models. Select from a single floorstand model, a single or double ceiling mount, a single wall mount model, or a single or double Fastrac™ model. A unique combination unit is also available that includes a CoolSpot™ II and Outpatient II light.

Do you need the intensity specifications of a surgery light but have limited space and/or a limited budget? If so, consider the CoolSpot™ II. No light in its price category can match the CoolSpot™ II's range of 10,000 footcandles at 61 cm (24 in) and color temperature of up to 4700°K. It's a sleek upgrade that offers a very compact head and extremely bright output. It is perfect for any laboratory or exam room requiring intense bright light.
