

Accessories for Premier, Value, and Boiling Baths

Racks and Raised Shelves

These racks are for use with the Premier Water Baths, Value Water Baths, and the Boiling Baths. Two different racks are available. Each holds a specific quantity of test tubes as specified below. Each bath can hold a specific quantity of racks.

Raised shelves alter the effective liquid depth of half the bath, to accommodate different shapes and sizes of vessel simultaneously. Each shelf provides two alternative depths. You can use more than one shelf per bath to achieve a range of depths.
