

CG - Sophisticated software for individual applications

CGS 5006.01

Perfect results by Aspect Plus

Beside stand-alone operation, it is also possible to operate the SPEKOL® 1100 and 1200 via a PC. In this case, the Windows-based Aspect Plus software controls the analysis and data processing. The software allows utilization of all advantages of the Windows platform: The number of stored methods and spectral data is virtually unlimited.
