

## CGS 1004.94

## Solvents (GC)

- |                                 |  |                                 |
|---------------------------------|--|---------------------------------|
| 1. Methanol                     | 21. Methyl Cellosolve                  | 41. Isobutyl acetate            |
| 2. Ethanol                      | 22. Hexane                             | 42. Dimethylhexane              |
| 3. Acetone                      | 23. 1-Butanol                          | 43. 2-Hexanone                  |
| 4. Isopropanol                  | 24. Isopropyl acetate                  | 44. n-Butyl acetate             |
| 5. Methyl acetate               | 25. 1,2-Dichloroethane                 | 45. 2-Methoxyethyl acetate      |
| 6. Ethyl ether                  | 26. 1-Chlorobutane                     | 46. Toluene                     |
| 7. Methylene chloride           | 27. 1,1,1-Trichloroethane              | 47. 2,2,5-Trimethylhexane       |
| 8. Pentane                      | 28. 2-Pentanone                        | 48. 1,1,2,2-Tetrachloroethylene |
| 9. trans-1,2-Dichloroethylene   | 29. 3-Pentanone                        | 49. Isopentyl acetate           |
| 10. Methyl ethyl ketone (MEK)   | 30. Ethyl Cellosolve                   | 50. 4-Heptanone                 |
| 11. Methyl t-butyl ether (MTBE) | 31. Benzene                            | 51. Chlorobenzene               |
| 12. 1,1-Dichloroethylene        | 32. Carbon tetrachloride               | 52. 2-Heptanone                 |
| 13. 1,1-Dichloroethane          | 33. 1,4-Dioxane                        | 53. Cyclohexanol                |
| 14. 2-Butanol                   | 34. Cyclohexane                        | 54. Cyclohexanone               |
| 15. Ethyl acetate               | 35. Isopentanol                        | 55. Butyl Cellosolve            |
| 16. Isopropyl ether             | 36. 1,1,2-Trichloroethylene            | 56. n-Pentyl acetate            |
| 17. 2-Methylpentane             | 37. Methyl isobutyl ketone (MIBK)      | 57. p-Xylene                    |
| 18. Isobutanol                  | 38. 2,2,4-Trimethylpentane (isooctane) | 58. m-Xylene                    |
| 19. Tetrahydrofuran             | 39. 4-Methyl-2-pentanone               | 59. 1,1,2,2-Tetrachloroethane   |
| 20. Chloroform                  | 40. Heptane                            | 60. Styrene                     |
|                                 |  | 61. o-Xylene                    |
|                                 |  | 62. 2-Methylcyclohexanol        |
|                                 |  | 63. 1-Octanol                   |
|                                 |  | 64. 1,2-Dichlorobenzene         |

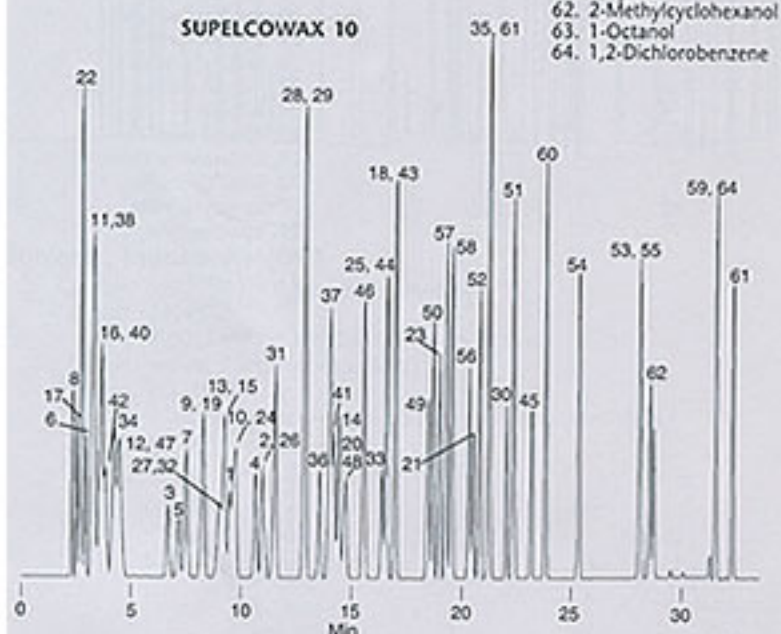

Oven: 40°C (5 min) to 220°C at 5°C/min

Carrier: helium, 5mL/min

Det.: FID, 300°C

Inj.: 0.2-0.3µL, split injection, 250°C

SUPELCOWAX 10

SPB-1
