

## EPA Método 8270 Semivolátil by GC/MS

Temperature: 40° (1°/min,hold) (12°/min) -  
 120°C -(10°/min) - 300°C  
 Injector: 225°C  
 Detector: MSD  
 Carrier Gas: 35 cm/sec., Helium

- |                                |                              |
|--------------------------------|------------------------------|
| 1- n-nitrosomethyleththylamine | 10-5-nitro-o-toluidine       |
| 2- n-nitrosodiethylamine       | 11- diphenylamine            |
| 3- n-nitrosopyrrolidine        | 12- 1,2-diphenylhydrazine    |
| 4- n-nitrosomorpholine         | 13- nitroquinoline-1-oxide   |
| 5- o-toluidine                 | 14- diazepam inibenzene      |
| 6- o-anisidine                 | 15- 4,4'- oxydianiline       |
| 7- cresidine                   | 16- 2- acetylaminofluorene   |
| 8- 5-chloro-2-methylaniline    | 17- 3,3' -dimethoxybenzidine |
| 9- diaminotoluene              |                              |
